Who's Taerenfabric?

Taerenfabric is a weaving mill specializing in interior decorative textiles, with a particular focus on curtain fabrics that feature natural textures and super-wide widths.

Over the years, we have built extensive experience in supplying the curtain industry with high-quality fabrics that combine the look of natural materials with the durability and performance of polyester.

We are proud to be regular participants in leading international trade fairs, including Intertextile Shanghai and Heimtextil Frankfurt. We look forward to connecting with you at our upcoming exhibitions—welcome to visit us there!
